

## Alex Crawley

My name is Alex, and I'm a pharmacist who has lived in Prince Albert since 2015. I work on reserve at the Sturgeon Lake Health Centre as a primary care pharmacist. I also manage a continuing education program for health care professionals called RxFiles Academic Detailing, through the University of Saskatchewan. In 2019 I was named the Pharmacist of the Year in Saskatchewan.

I have a great passion for education – both of my parents were school teachers! – and I want to help build the best possible public school system for our children, including my 5-year-old son who started Kindergarten this year. I would like our public schools to be the very best they can be.

I've served in leadership roles on many professional committees and boards, including the Pharmacy Association of Saskatchewan, the Canadian Society of Hospital Pharmacists, the Prince Albert Music Festival, and the Prince Albert Ski Club. I take pride in my ability to work well with people who have different viewpoints from me, seeking compromise and finding common ground.

I currently manage a budget of over a million dollars per year with the University, and I look forward to bringing that fiscal experience to the school board. I also have experience working with diverse populations with differing needs, which I view as another asset to the board.

I hope to have your support in advocating for and improving public education.

Sincerely yours,  
Alex Crawley (BSP, ACPR)
