

Daphne Masih

Prince Albert is my home, where I have been a dedicated community member working for the best for our community, leading with honour and integrity. My position at Communities Building Youth Futures has allowed me to work toward the removal of barriers for youth in the areas of education and employment where we continue to create youth-focused opportunities.

I am honoured to serve on the PA Food Bank Board, Community Networking Coalition Steering Committee, Inter-Agency Youth Working Group, Municipal Cultural Action Plan Working Group, and the Heart of the Youth Community Powwow Committee.

I hold a B.Sc. in Psychology focusing on human development into emerging adulthood, and an M.Div. focusing on Leadership. My personal experiences in such diverse areas of study and work have allowed me to see the dramatically different impact that one decision can have on people with differing experiences, backgrounds, and life events. I hope to bring a holistic view, essential partnerships, and continued support to work already being done.

My five children attend within the school division, where I hope to see them thrive with their peers, teachers, and other staff. It is my firm belief that youth are not simply future leaders, but that they are the leaders of today wherever they are. It is my hope that, should I be elected to serve as School Trustee, that I would be part of positively impacting the present and future of our students and staff, and creating lasting legacy that our community can proudly carry forward.
